

FEATURED ALUM-A-LIFT CLEAN ROOM ROBOT EXTRACTOR

PROJECT 27448

MODEL A800CRCSLR-84

FEATURING Rotating height adjustable load arm, base mounted stabilizer arm, powered lateral shuttle, and class 100 clean room compatibility

HANDLING 135 lb [61 kg] robot and rail assemblies

DETAILS Floor space in a semiconductor clean room comes at a premium, often resulting in narrow aiseways. This Alum-a-Lift allows for the extraction of a Kawasaki robot into an aisle narrower than the robot track's length. Easy one-person operation eliminates risk of injury to personnel and equipment
