

FEATURED ALUM-A-LIFT MOLD HANDLING SYSTEM WITH ARTICULATING GRIPPER

PROJECT 28065

MODEL A1500CSLRPD-68

FEATURING Powered Gripper with Rollers, Two-Segment Articulating Arm with Locks.

HANDLING 300 lb [136 kg] Shell and Core Molds

DETAILS Shells and cores are used to mold a variety of timing belts. This Alum-a-Lift allows for secure gripping of the mold while maintaining the ability to index its mounting holes to match to machine. The articulating arm allows the lift to be parked in the tight area near the machine while the operator manually aligns the mold into position.
