

# FEATURED ALUM-A-LIFT IN-CIRCUIT TEST FIXTURE LIFT WITH TILT CONTROL

## PROJECT 28520

**MODEL** B350CSTF-72

**FEATURING** 50° Powered Rotating Fixture Gripper, Overload Sensing

**HANDLING** 250 lb [113 kg] In-circuit Test (ICT) Fixtures

**DETAILS** PCB test fixtures for Automated Test Equipment (ATE) can be heavy and expensive. Alum-a-Lift offers a complete line of fixture lifters, eliminating the risk of injury to personnel or damage to equipment. Solutions exist for all fixture sizes, and for testers with both flat and angled interfaces. This featured lift includes the ability to rotate fixtures a full 50° for interface with angled testers. Compatibility with the popular Keysight (Agilent/HP) i3070 series of testers and our industry standard “Alum-a-Grip” fixture handle geometry is included on all units. Overload and obstacle encounter detection is also available to further protect fixtures and the test interface.
