

# FEATURED ALUM-A-LIFT DIE HANDLING POWERED PUSHER PULLER PLATFORM

## PROJECT 28646

**MODEL** A800CS-72

**FEATURING** Powered pusher puller with overload protection, universal docking feature

**HANDLING** 300 lb [136 kg] Dies

**DETAILS** A major aerospace manufacturer needed a lift to alleviate a die handling safety issue. The lift is equipped with a powered pusher/puller platform capable of handling dies of varying shapes and sizes. Push and pull force are independently adjustable using an internal switch arrangement. Universal docking capability provides a repeatable mate between the lift and pallet / rack without requiring modifications to existing equipment.
