

# FEATURED ALUM-A-LIFT CLEANROOM LIFT WITH SWIVELING HOIST RING

## PROJECT 29101

**MODEL** L200CRCS-72

**FEATURING** Anodized Boom, Swiveling Hoist Ring, Low-Profile legs, Class 1000 Cleanroom Compliance

**HANDLING** 150 lb [68 kg] subassemblies and components

**DETAILS** Floorspace in a clean room often comes at a premium. This lightweight, compact lift was configured to be a perfect match with its load and environment. Designed to transport electromechanical subassemblies between work areas, this lift includes special low profiles legs that fit in existing clearance underneath work tables and process equipment. Its narrow frame allows the system to pass through doorways and tight aisles. Interacting with the load is a cantilevered boom arm which can interact with existing equipment as well as Alum-a-Lift-supplied custom lifting fixtures.
