

FEATURED ALUM-A-LIFT INTRINSICALLY-SAFE STATIONARY PLATFORM LIFT

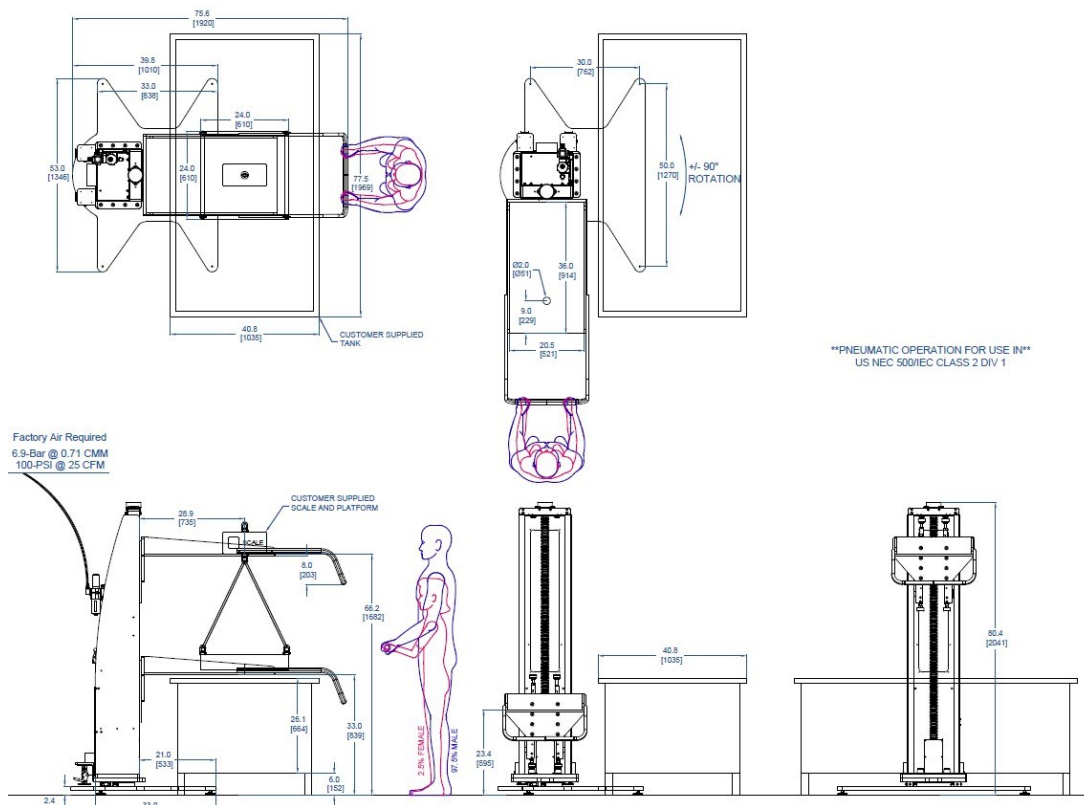

PROJECT 30267

MODEL A800CS-72

FEATURING Platform with positioning handle, swiveling mast with foot-operated locks, pneumatic operation, stationary self-stable base

HANDLING 200 lb. of tooling and explosives

DETAILS A national laboratory needed a safe way to remove an explosive assembly from a cart and immerse it in a liquid bath. In order to be intrinsically safe for the explosive environment, the lift forgoes all electrical components in favor of pneumatic operation. Pneumatic operation makes the lift suitable for use in NEC 500/IEC Class 1 & 2, Division 1 & 2 environments. The lift's self-stable, stationary base requires no mounting holes in the floor, and the entire lifting column swivels 90-degrees in either direction to position the load.
