

FEATURED ALUM-A-LIFT
 SELF-PROPELLED MULTI PURPOSE TOOL AND FIXTURE LIFT

PROJECT
26436

MODEL A800CSPD-66

FEATURING Quick exchange and indexable end effectors: dual prong and boom with lifting straps, powered lateral shuttle, high speed vertical drive

HANDLING 150 lb [68 kg] Fixtures and Tooling

DETAILS The loading of fixtures and tooling in an automotive manufacturers paint department requires long reach over anti-fatigue mats. This lift features a steerable powered drive wheel to eliminate the ergonomic concerns of manually pushing a lift over these mats. The high speed vertical drive allows for the rapid loading of multiple paint stations with one lift. The quick exchange and indexable end effectors increases the versatility of the lift to handle multiple fixtures and tooling.
