

FEATURED ALUM-A-LIFT MOBILE VACUUM LIFTER WITH HIGH-FLOW HEAD

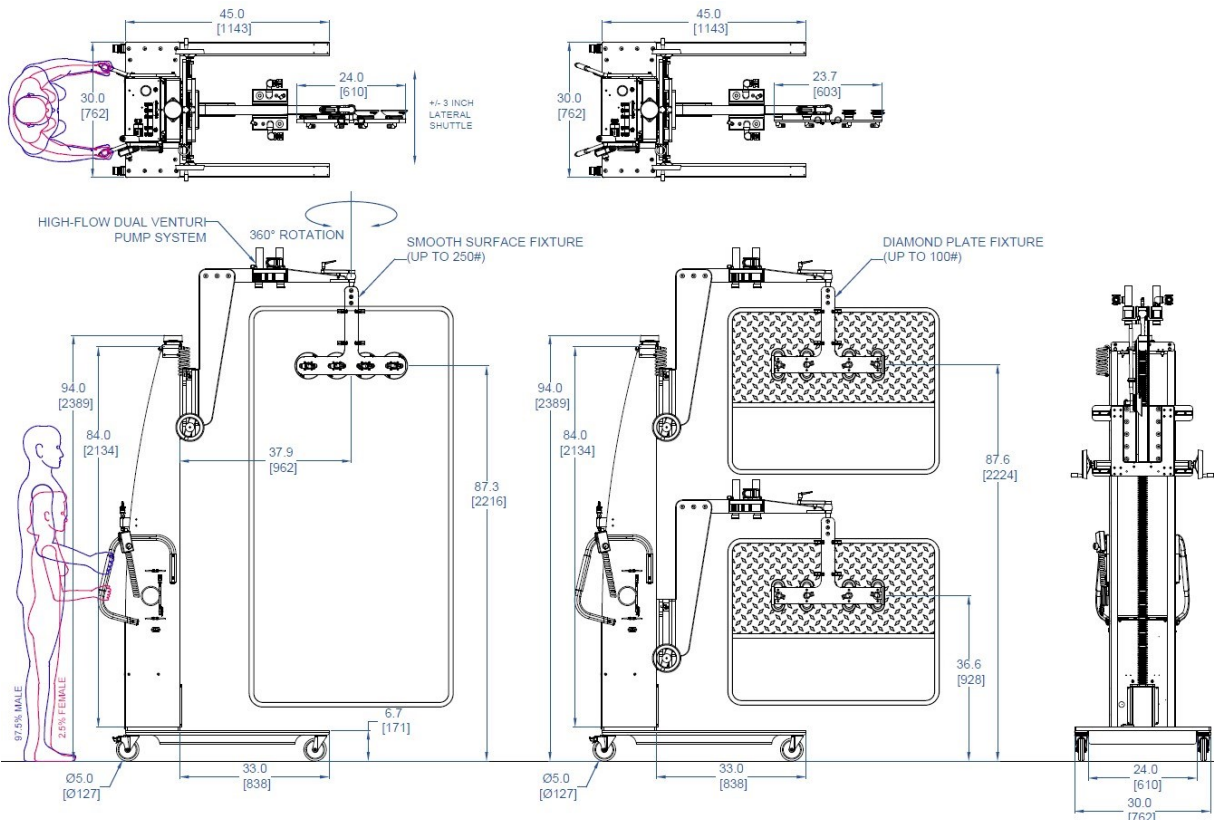

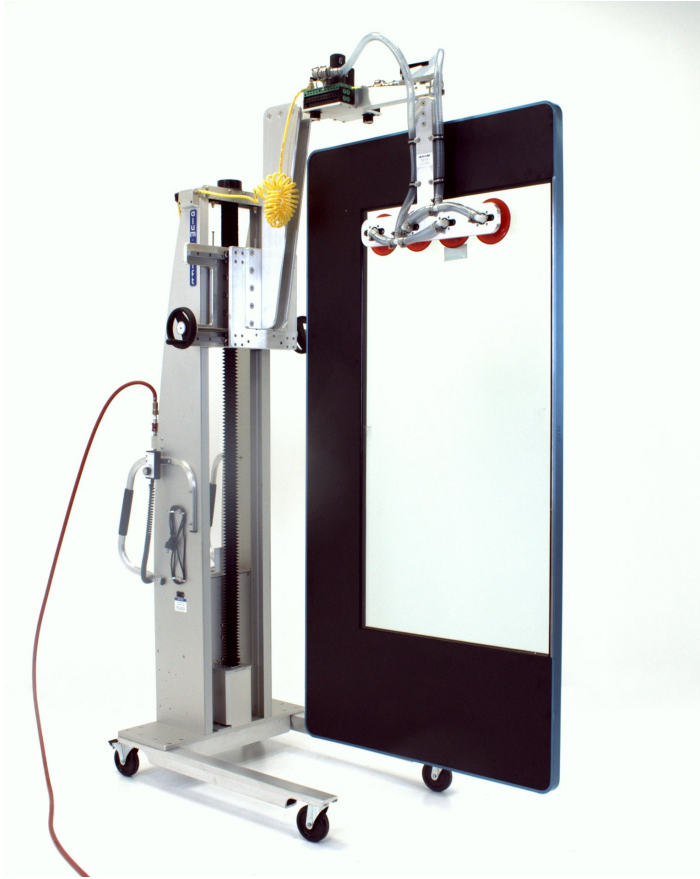

PROJECT 29234

MODEL A800CS-72

FEATURING Interchangeable Vacuum Fixtures, 360° Swiveling, Dual Venturi Vacuum Pumps, ±3" Lateral Shuttle

HANDLING 250 lb [113 kg] Panels

DETAILS A commercial refrigeration unit manufacturer needed a lift to handle a variety of end-panels for final assembly. Suction head fixtures were developed to interface with the various panels, including a specialized fixture for drawing vacuum on diamond tread plate. The lift includes a high flow vacuum system powered by a compressed air connection and utilizing two Venturi vacuum pumps to create sufficient suction for a secure lift on smooth surfaces or the diamond plate. A lateral shuttle module allows the operator to precisely position the panel for installation.
