

FEATURED ALUM-A-LIFT  
 ERGONOMIC ROLL HANDLING LIFT WITH DOUBLE V-TROUGH

PROJECT  
**30313**

**MODEL** A800CS-102

**FEATURING** Double v-trough with non-marring neoprene lining

**HANDLING** 600 lb [272 kg] Rolls and Cores

**DETAILS** Pre-preg composite materials are temperature sensitive and need to be quickly moved from the freezer to the cutting table. This Alum-a-Lift features dual v-troughs for handling full size rolls alongside partial rolls or empty cores. This allows the operator to save precious time by reducing trips between freezer transports carts and the multi-roll carousel system.
