

FEATURED ALUM-A-LIFT
 MULTI-PURPOSE LIFT FOR AEROSPACE WORK POSITIONING

PROJECT
30021

MODEL A800CLR-45

FEATURING Tool-less Quick-Exchange Interface, Lateral Shuttle, Roll Module, Front-to-Back Shuttle, Yaw Module, Spring Overload/ Obstacle Encounter, Side Push Handles, Low Profile Base, Floor Brake

HANDLING 288 lb [130 kg] Objects

DETAILS Installing heavy components inside of an airplane can be a difficult task due to the tight quarters. This Alum-a-Lift features a work positioning end-effector to provide fine alignment in nearly every degree of freedom. The quick exchange interface allows for a variety of fixtures to be attached. The lift's compact form factor allows the lift to fit in the tightest of areas inside the plane. This system allows a single operator to handle components that would usually require a team people.
