

FEATURED ALUM-A-LIFT
 LIGHTWEIGHT LIFT WITH PLATFORM FOR SERVER BURN-IN

PROJECT
30771

MODEL L200CS-84

FEATURING Low-Profile Platform, Non-Marring Depth Stops, Lifting Speed Control, Quick Exchange Batteries

HANDLING 200 lb [90 kg] Servers

DETAILS During burn-in, newly manufactured servers are loaded into racks for software installation and test. This lift includes a low profile platform with non-marring depth stops for quick loading into densely populated burn racks. A quick-exchange battery system and off-line charger enables battery exchanges to occur in seconds without the use of hand tools. Alum-a-Lifts have been proven in 24/7 burn-in operations and offer superior durability, outlasting all known alternatives.
