

FEATURED ALUM-A-LIFT MOBILE PLATFORM LIFT WITH CONVEYOR INTEGRATION

PROJECT 31446

MODEL L200CS-60

FEATURING Front Mount Lift Controls, Front Mount Handle, Dual Floor Brake, Minimized Footprint

HANDLING 125 lb [57 kg] Trolleys

DETAILS This lift was configured for a manufacturer of electrical assemblies who uses a monorail and trolley system to transport product throughout their process. A section of monorail track was added to the lift's platform, allowing 125 lb. finished assemblies to be effortlessly transferred from the line to the lift and from the lift to vertical storage racks. The lift's light weight makes transport throughout the facility easy. Variable speed lift controls, push handles, and a foot operated floor brake are located near the platform, allowing the operator full use of the lift from a single position.
