

FEATURED ALUM-A-LIFT
 COMPACT FORKLIFT FOR ELECTRONICS ENCLOSURES

PROJECT
31665

MODEL C800CSPD-60

FEATURING Adjustable width forks, counterbalanced with powered drive wheel

HANDLING 125 lb [57 kg] Electronics Enclosures

DETAILS Manufacturing of electronics sometimes includes a bake-out procedure of completed assemblies. This Alum-a-Lift features an adjustable width forkset to handle a variety of enclosures. The extended reach forks and counterbalanced design allow for placing the components completely inside the oven, even when no leg clearance is available. This ergonomic material handling tool enables a single operator to safely complete what would normally be an awkward two person lift.
