

FEATURED ALUM-A-LIFT  
**SELF-PROPELLED ROLL LIFT WITH PRONG AND STAGING CART**

PROJECT  
**32260**

**MODEL** A800CSPD-60

**FEATURING** Boom with Adjustable Depth Stop, Drive Wheel, Low Profile V-Trough Cart.

**HANDLING** 450 lb [204 kg] Rolls

**DETAILS** This lift features a cantilevered core shaft and an adjustable backstop to easily and repeatedly remove individual rolls from a pallet. Provided with the lift are companion v-trough carts that serve a few purposes. Rolls placed on these carts become mobile and can be staged near self-loading unwinders. For machines that must be loaded using the lift, the carts can be used to reorient the roll and change its payoff direction.
