

FEATURED ALUM-A-LIFT  
 COMPACT ROLL HANDLING LIFT WITH ROTATING V-TROUGH

PROJECT  
**32079**

**MODEL** L200CS-60

**FEATURING** Swiveling V-Trough, Compact Footprint

**HANDLING** 50 lb [23 kg] Rolls

**DETAILS** Some roll handling processes involve navigating tight spaces in order to access the machine or storage rack. This Alum-a-Lift features a swiveling v-trough and compact design, which allows rolls of paper or plastic film to be handled and maneuvered into small or hard to reach areas. The +/- 360° swivel on the v-trough allows for easy alignment of the rolls on the equipment in oftentimes tight quarters.
