

FEATURED ALUM-A-LIFT SLOT MACHINE CLAMP LIFT WITH INTERCHANGEABLE PADS

PROJECT 32314

MODEL A800CS-72

FEATURING Interchangeable Clamp Pads, Powered Clamp with Force Limiter, Quick Exchange Batteries

HANDLING 600 lb [272 kg] Gaming Machines

DETAILS A manufacturer of video gaming machines required a lift to assist with palletizing the machines at the end of an assembly line. This lift features a powered clamp with interchangeable clamp pads, including a set of large, flat pads to grip the sides of robust machines, and a customized set that cradles more delicate cabinets which cannot tolerate clamping pressure. The lift's wide base allows it to straddle the pallets, and quick exchange batteries enable operators to use the lift continually without the need to take it out of service for charging.
