

FEATURED ALUM-A-LIFT
 LIGHTWEIGHT ROLL HANDLING LIFT WITH ROLLER BOOM

PROJECT
32733

MODEL L200CRCS-72

FEATURING Adjustable Back Stop, Flip-Up End Stop, ISO 8 Cleanroom Compatible

HANDLING 75 lbs [34 kg] Rolls

DETAILS This material handling device is used in the manufacturing of plastic packaging material in an ISO 8 (Class 100,000) Cleanroom environment. A roller boom fits inside the 6-inch core of the roll and features embedded rollers to reduce friction and allow for easy loading and unloading. A flip-up roll stop prevents rolls from sliding off the lift during transport. An adjustable back stop allows the operator to easily adjust the roller boom to be used with different sized rolls.
