

FEATURED ALUM-A-LIFT
 ERGONOMIC LIFT WITH PLATFORM FOR ROLLER CARTS

PROJECT
33085

MODEL B350CS-72

FEATURING Low Profile Platform with Detachable Fence

HANDLING 250 lbs [113 kg] Roller Cart

DETAILS This Alum-a-Lift handles heavy rolling carts populated with circuit breakers to be installed into freestanding electrical enclosures. The lift features a metal platform that is sized to match the carts. The platform can be lowered to ground level for easy loading and unloading from the floor. A detachable fence secures the carts during transport. The lift's footprint is also customized to fit the platform without wasting additional floor space. This ergonomic material handling tool perfectly demonstrates Alum-a-Lift's ability to offer a turnkey solution that seamlessly fits an existing process.
