

FEATURED ALUM-A-LIFT

ESD PLATFORM LIFTER FOR HANDLING ELECTRONICS CHASSIS

PROJECT
33404

MODEL L200CS-72

FEATURING Electrostatic Discharge Platform with Removable Guards, Obstacle Encounter and Overload Detection, Low Profile Handles

HANDLING 150 lb [68 kg] Electronics Chassis

DETAILS This Alum-a-Lift features a large electrostatic discharge (ESD) platform to safely transport electronics chassis. This platform has removable side guards to ensure chassis security during transport. A low profile and tri-directional loading allow for navigation of narrow facility aisles. This ergonomic material handling equipment enables a single operator to safely handle and manipulate large and heavy equipment.
