

FEATURED ALUM-A-LIFT  
 DEMOLDER MAINTENANCE LIFT WITH ROTATING FORK SET

PROJECT  
**33270**

**MODEL** A800CS-72

**FEATURING** Manual Rotation Module, Low Friction Delrin Inserts, Adjustable Vertical Lift Speed

**HANDLING** 90 lb [41 kg] Demolder Vacuum Heads

**DETAILS** This lift was designed to remove vacuum heads from a confectionary demolder machine for periodic maintenance and cleaning. Low friction plastic inserts allow the user to easily unload the demolding component from the production line machine, rotate it, and perform routine maintenance checks. This lift enables a single operator to unload, handle, and inspect components while minimizing production line downtime and eliminating the risk of injury or equipment damage.
