

FEATURED ALUM-A-LIFT
LIFTING CART WITH SIDE RAILS FOR LOADING CURING OVENS

PROJECT
33658

MODEL A800CRCS-48

FEATURING Low Friction Platform with Adjustable Side Supports. Class 1000 (ISO 6) Cleanroom Compatibility

HANDLING 350 lb [159 kg] Carts

DETAILS This lift was designed to help load rolling carts of uncured electronic components into thermal chambers in a Class 1000 (ISO 6) cleanroom. The lift's platform was sized to fit within the narrow space between the curing cart's casters. To secure the cart from tipover when transported to the ovens, adjustable side rails were added to the system.

This ergonomic handling tool eliminates all manual lifting and enables the sensitive electronic components to be loaded safely and quickly.
