

FEATURED ALUM-A-LIFT COUNTERBALANCED PHARMA ROLL HANDLING LIFT

PROJECT 31638

MODEL C800CS-72

FEATURING Powered clamp with Rotating Wrists, Counterbalanced Frame

HANDLING 170 lb. [77 kg] Rolls

DETAILS Alum-a-Lift developed this counterbalanced lifting system for a global leader in biopharmaceuticals. This lift seamlessly picks up rolls from pallets placed directly on the floor. Our engineers diligently assess stability, ensuring a 10° margin of safety against tip-over for every lift. This evaluation enables us to optimize this balanced lift mechanism to meet this requirement while maintaining optimal functionality and performance.
