

# FEATURED ALUM-A-LIFT GRIPPER LIFT FOR BIOPHARMACEUTICAL FILTERS

## PROJECT 33045

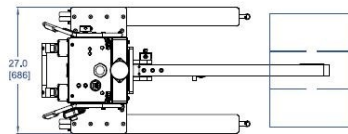

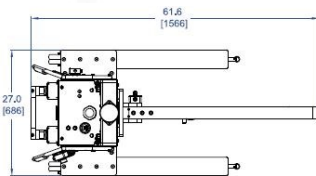

**MODEL** A800CSWD-72

**FEATURING** IP65 Washdown , Safety Overload Boom, Manual Forward shuttle, Triple Head Powered Gripper

**HANDLING** 80 lb [36 kg] Filters (3), Max Load 240 lb [109 kg]

**DETAILS** This lift was designed to alleviate the need for operators in a biopharmaceutical production environment to manually lift used inline filters. The existing operation required the operators to pick up the 80 lb [36kg] filters one by one and discard them into a disposal bin. This operation of lifting/twisting posed risks for back and shoulder injuries. This Alum-A-Lift features a powered gripper head that allows a single operator to lift 3 filters simultaneously and safely dispose of them reducing the strain on their backs. The forward shuttle and pivoting gripper head further enhance the ease of positioning.

IP65 WASHDOWN RATED
