

FEATURED ALUM-A-LIFT
 MULTIPURPOSE LIFT FOR MEDICAL DEVICE MANUFACTURING

PROJECT
33484

MODEL B350CS-84

FEATURING Interchangeable Boom and Platform, Tool-less Exchange, Removable Swiveling Spreader Bar with Straps, Low-Profile Leg, Speed Control

HANDLING Various Components weighing up to 150 LB [68 KG]

DETAILS This Multi-use Alum-a-Lift was designed for a prominent medical device manufacturer with limited storage space. It features an interchangeable boom and platform to service various components. This system also includes a custom swiveling spreader bar to connect with specific battery assemblies. This custom spreader bar can be removed which allows for general lifting of other objects. The low-profile legs allow the lift to fit underneath existing machine and table clearances.
