

# FEATURED ALUM-A-LIFT HIGH PRECISION INTERCHANGABLE WORK POSITIONER LIFT

## PROJECT 33629

**MODEL** A800CRSLR-72

**FEATURING** 2 DOF Shuttle, Rotation Module, Class 0A ESD, Toe Guards, Class 100,000 (ISO 8) Cleanroom

**HANDLING** 150 lb [68 kg] components

**DETAILS** Designed to operate within a Class 0A (ESD) environment and accommodate the installation of multiple components, this Alum-a-Lift incorporates specialized modules for the precise manipulation of delicate electronic elements. Serving as a versatile workstation, this lift empowers operators to install components with precision, positioning them directly onto the target component while providing adjustable capabilities for ergonomic maneuvering. The end effector is equipped with a bolt-on interchangeable interface, enabling users to handle two different components in various orientations.
