

FEATURED ALUM-A-LIFT
 WORK POSITIONER LIFT FOR HANDLING ELECTRO-MECHANICAL COMPONENTS

PROJECT
34139

MODEL A800CSLR-72

FEATURING 360 ° Rotation Module and Fixture, Powered Trunion, Swinging Forkset

HANDLING 500 lb [204 kg] Mast Assemblies

DETAILS A leading defense manufacturer required an ergonomic material handling solution capable of lifting a 500lb mast and rotating it to facilitate the assembly and installation of electro-mechanical components within its shell. The powered variable-speed lifting and rotation system provides accessibility to all sides of the mast, meeting the rigorous clearances typical in defense environments. This work positioner lift can be securely tethered to the floor to withstand external forces, ensuring minimal movement during assembly.
