

FEATURED ALUM-A-LIFT  
 ROTATING FORK SET LIFT FOR LASER OPTICAL ASSEMBLIES

PROJECT  
**34158**

**MODEL** L200CS-72

**FEATURING** 360° Rotation with Manual Locks, Delrin Channels with Locking Pins, Low Profile Legs, Lightweight

**HANDLING** 175 lb [80 kg] Laser Assemblies

**DETAILS** A leading optics manufacturer requested a versatile lift to handle both old and heavier new product lines that can lift, rotate, and set down 175 lb laser assemblies during manufacturing and function in a variety of tight spaces and narrow hallways. This lightweight Alum-a-Lift was constructed to reduce operator fatigue when moving between work locations and comes with low profile legs to fit under tight clearances, Delrin channels with locking pins to securely hold existing products, and rotates 360 degrees to access both the top and bottom of housing assemblies; making it the perfect solution.
