

FEATURED ALUM-A-LIFT
 ROTATING FIXTURE LIFT FOR CHOCOLATE PRODUCTION LINE

PROJECT
36101

MODEL A800CS-90

FEATURING Heavy Duty Powered 360 Degree Rotation, Extended Container Fixture with Tethered Lock Pins

HANDLING 150 lb [68 kg] Container Bins

DETAILS This innovative lifting solution features a rotating fixture designed to handle bins that collect chocolate drops and wafers at the end of a chocolate production line. These drops later need to be deposited into a tank to be remelted. Alum-a-Lift's solution enables an operator to remain at a safe distance, eliminating an awkward and potentially dangerous material handling maneuver. Furthermore, the fixture is equipped with locking pins to securely hold the bin in place during handling and rotation for these heavy loads.
