

FEATURED ALUM-A-LIFT
 ARTICULATING CLAMP LIFT FOR HANDLING GAS PURIFIER FILTERS

PROJECT
35554

MODEL

A800CSLR-72

FEATURING

3 Segment Articulating Arm, 180° Rotation, Manual Clamp, Fixed Wrists, High Temp Pads

HANDLING

50 lb [22 kg] Filter Modules

DETAILS

This lift offers flexible handling for gas purifier filters and much more. Its extended gripper and articulating arm make it easy to reach items positioned beyond its base. A secure manual clamp ensures stable lifting, even at full capacity.

The rotation module enables smooth 180° rotation for convenient access, inspection, or installation. For added safety, the arm's limit rotation maintains stability during operation.

The high-temperature pads allow the lift to safely grip, support, or transport components with temperatures up to 400° F due to industrial processes, preventing material damage during handling.
